

# ■ SPECTRAL

making technology invisible.

Do you hate cables lying about?  
**Then continue reading.**

No **comments.**

## No cables.

We at SPECTRAL are simply speechless when it comes to the cable chaos that runs rampant in many living rooms: intrusive speakers, metres of visible cables, five different remote controls and often an iPhone with charger cable lying about. Our home cinema systems finally bring order to your living room. The speakers are built into the furniture. All cables are also concealed nicely inside the unit. The iPhone has its own docking station. The numerous different remote controls are replaced by a single device. In addition, thanks to the infrared link system, you can even control all your devices when the flaps are closed.

### Your benefits with SPECTRAL:

- No visible cables lying about
- No visible speakers
- Just one remote control
- Docking station for iPhone and iPod

Concealed **speakers.**

### How does Virtual Surround Sound actually work?

The left and right speakers as well as the subwoofer (2.1) are incorporated in a single speaker unit. With the help of advanced sound processing, your ear perceives a surround effect without requiring five speakers and a subwoofer (5.1), as you do with a regular surround system. Thanks to the Dolby® SRS technology there is no need for walls or other reflective surfaces.

### Advantages of Spectral Virtual Surround Sound Systems

- No obtrusive speakers and no cables lying about
- Built-in subwoofer and digital surround receiver (amplifier with built-in RDS tuner/radio)
- Programmable universal remote control for use with other devices
- Flexible positioning of furniture within the room
- Ultra low heat generation thanks to the digital amplifier
- Components that match and complement each other perfectly

### Sound and praise from all sides

Tests conducted by a range of trade magazines show Spectral Virtual Surround Sound Systems can keep up with the competition. Further proof are the goose bumps on your forearms when BRA1, SCA1, CLA1, CTA1 and CTA2 unleash their full potential.

### A wide selection of sound modes

If you want to listen to a CD, an iPod or radio, simply select Stereo mode for full, rich stereo sound or Wide mode for a 3D audio experience. If you want to experience a film, select Virtual Surround Mode 1. To listen to a music DVD (e.g. a live concert), select Virtual Surround Mode 2.

### Technical specifications (BRA1, CLA1, CTA1 and CTA2)

Top quality fully active 2.1 virtual surround music and home cinema system: 3-way bass reflex system with integrated subwoofer, digital 350 watt multi-channel power amplifier, inputs 4 digital / 2 analog, integrated FM tuner (radio) with learnable system remote control (controls all infrared devices), loudspeaker impedance: 4 ohm frequency range 30 Hz to 24 kHz. Systems support Dolby® Digital, Dolby® Pro Logic®II, DTS® and Stereo.

### Technical data: SCA1

Fully active 2.0 music and home cinema system, for balanced sound: 2-way bass reflex system, 100 watt power amplifier, inputs 3 analog, infrared remote control, easy operation.

## Outstanding **sound.**

The SPECTRAL home cinema systems feature loudspeakers which are integrated within the furniture and hidden from plain view. Create an impressive surround sound experience without any intrusive speakers or unsightly cables. Numerous tests account for the excellent stereo sound.

### Your benefits with SPECTRAL:

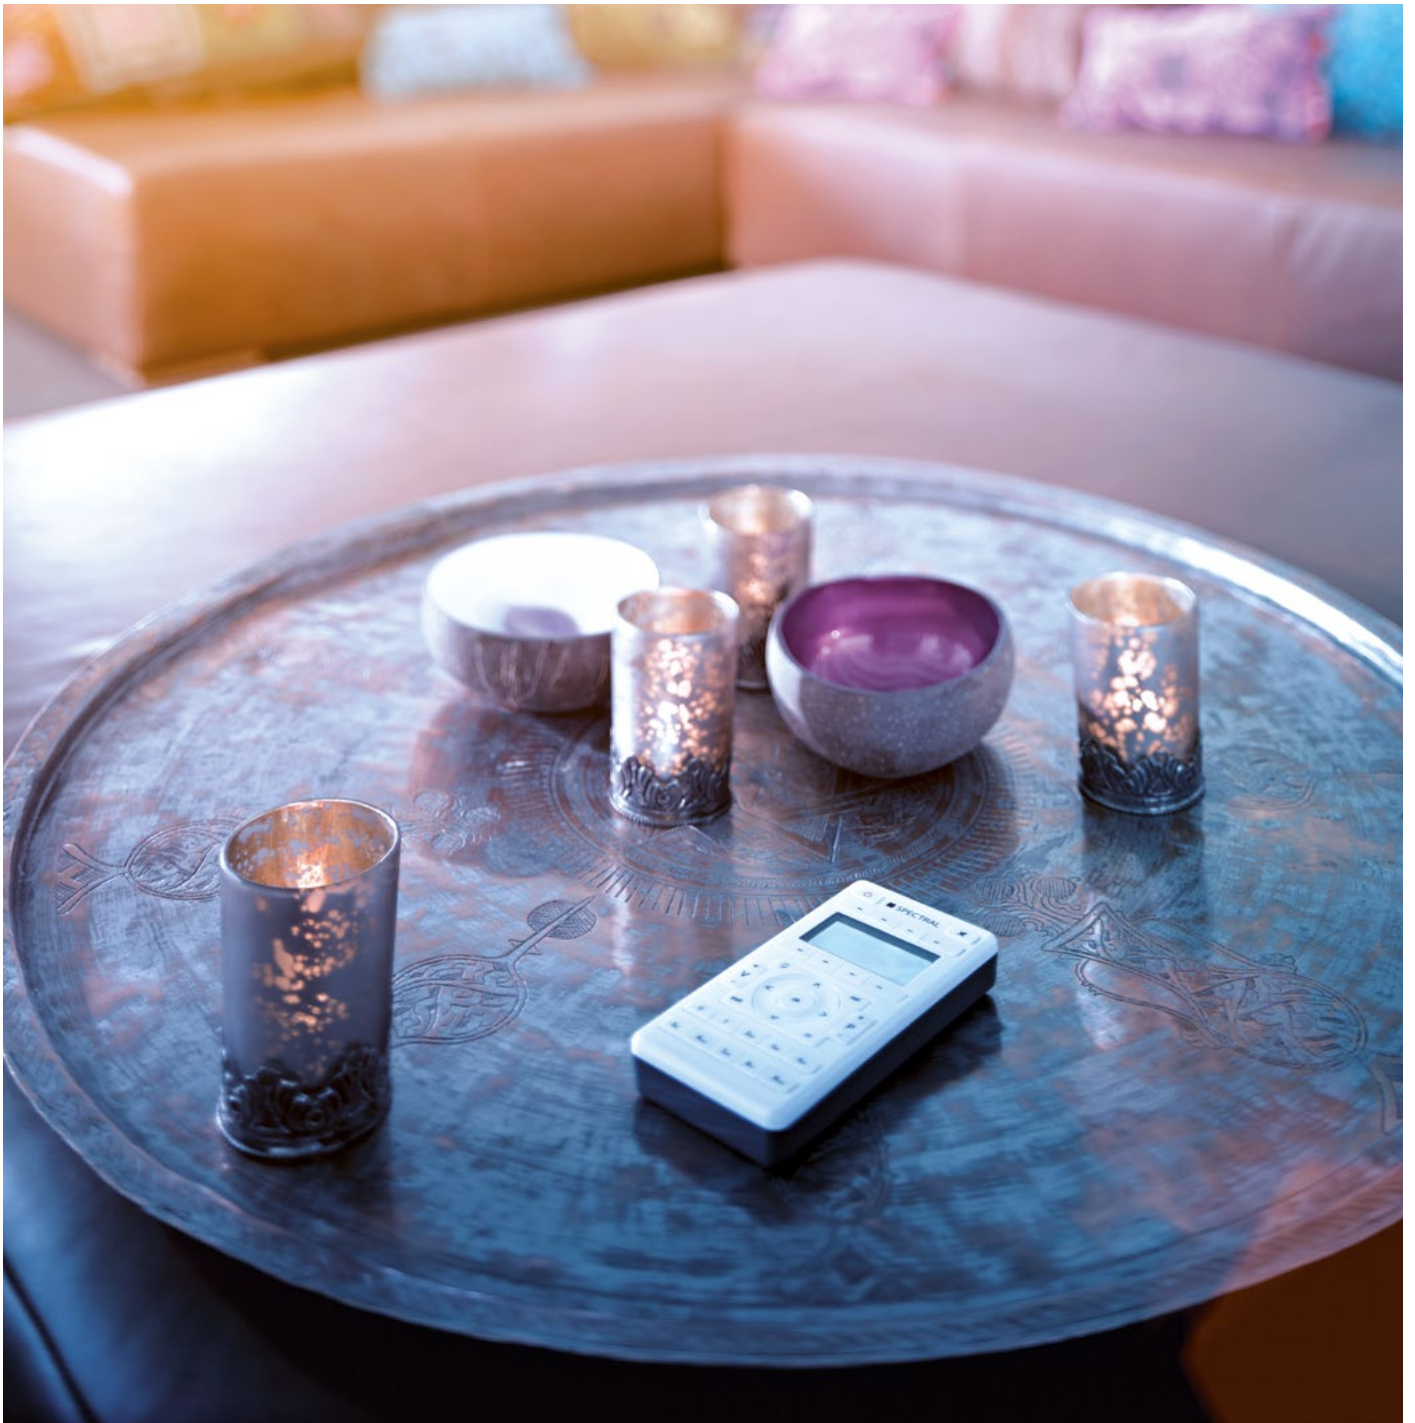

- Surround Sound  
without intrusive speakers
- Integrated subwoofer
- Integrated RDS tuner (radio)
- Ultra low heat generation  
thanks to the digital amplifier
- Winner of numerous awards

**All** for one.

## One for all.

DVD player, satellite receiver, television, amplifier, tuner: if you want to enjoy home entertainment from your sofa, you'll usually have your hands full with several different remotes. With our universal remote control, you can say goodbye to the chaos. The SPECTRAL REMOTE memorises the functions of all your remote controls. Once its programmed, you can control all your AV devices thanks to the infrared link system available as an accessory, even when the furniture flaps are closed.

### Your benefits with SPECTRAL:

- **Just one remote control for all devices**
- **Control over all devices even when the furniture flaps are closed**
- **Control of the SPECTRAL multi-colour LED illumination**

Simply **plug and play.**

## Simply **play.**

The SPECTRAL furniture models MUSIC BOX, SCALA, DISC, COCOON, BRICK and COCKPIT are now available with a docking station for iPhone and iPod. COCOON is also equipped with an iPad docking station. The original Apple Docks and matching cables are located under the furniture's glass top. Simply place your iPhone, iPod or iPad into the dock and it is immediately connected to the television and sound system. This enables you to stream music, pictures and videos to the television or sound system directly. The dock also functions as a charging station with no visible cables lying about.

### Your benefits with SPECTRAL:

- **Stream music, photos and videos to your TV and sound system**
- **Charge your portable devices without cables**
- **iPhones are always in the same spot**

# Finally call it a day.

The SPECTRAL MUSIC BOX is not just a key rack, storage space and telephone table in one, it's also your iPhone's new home. Once its placed in the station, your iPhone unleashes excellent sound from the integrated SCA1 sound system, making your time away from the office the opportunity to enjoy the music. Your iPhone is also charged in the process; ready for you to use the next day.

# Music above. **Box below.**

The SPECTRAL MUSIC BOX is the perfect combination of furniture and sound dock. Not only does it offer excellent entertainment, it also provides plenty of storage space.

SPECTRAL MUSIC BOX SMB1-iP  
with flap for additional devices such as a CD player or WLAN router

SPECTRAL MUSIC BOX SMB2-iP  
with drawer is the ideal place for storing all sorts of odds and ends

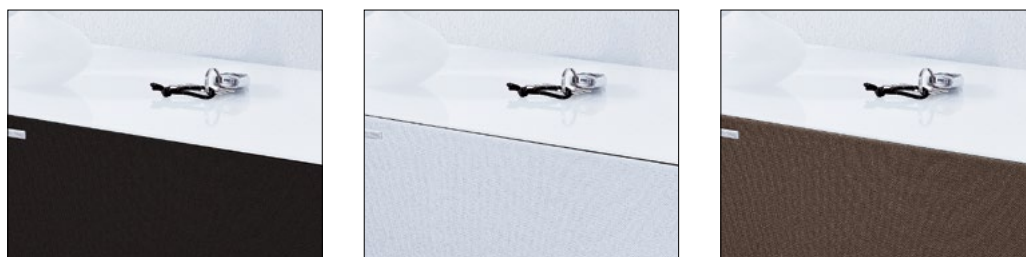

# Turn up the volume and relax.

Regardless whether living room, lounge or library, the SPECTRAL MUSIC BOX brings music to the spots you enjoy being in and feel most comfortable. The matching SCH37 wall cabinet from SCALA range creates additional storage area for books, magazines and other nice things.

Tip: The SPECTRAL MUSIC BOX is best combined with SCALA and COCOON wall cabinets.

**Adapter for streaming music wirelessly**  
**ZU 1756** Advance Acoustic Bluetooth Adapter for streaming music via Bluetooth wirelessly

**SCA1 Sound System**

A modern interior space with a large window in the background. In the foreground, there is a glass display case containing a globe. A textured rug is visible in the bottom left corner. The overall atmosphere is bright and contemporary.

# There's no place like home.

As much fun as travelling is, sooner or later, the desire to return home will get the upper hand. SCALA by SPECTRAL is one reason. The elegant cabinet furniture offers you a great deal of freedom when designing your own four walls thanks to a vast selection of low boards and wall cabinets. Integrated sound systems and an optional docking station for iPhone or iPod make sure you never get bored at home even after you've decorated.

# Only flying is **more exciting.**

Give your living room a touch of lightness with a levitating SCALA, matching wall cabinets and a SPECTRAL MUSIC BOX and light music enjoyment thanks to the docking station for iPhone and iPod.

# SCALA has **many faces.**

Even when used as a solitary low board, SCALA does not lose its elegance. To combine two low boards a connector foot, which is positioned centrally under both cabinet units, is available. Back panels are also available should you wish to use your SCALA as a room partition.

## You won't get in a flap over our flaps.

SCALA is now available with a fabric-covered flap. It nicely conceals an optionally integrated sound system for an impressive sound experience. What's more, it offers space for devices such as media servers, game consoles or Blu-ray players which won't overheat thanks to the fabric covering on the furniture.

SCALA SC1651 in silver with fabric flap in black rotatable TV mount, docking station for iPhone and iPod and BRA1 sound system

# Every Loewe system needs a home.

Do you swear by Loewe sound systems?

If you do, get the perfectly matching furniture for your home:

the SCALA SC1652 and SC1653 models were specially developed,  
to house the Loewe sound projector and down-firing subwoofer.

SCALA SC1653 in snow glass with fabric flap in silver  
docking station for iPhone and iPod, rotatable TV mount.

Upper compartment: space for three devices

Lower compartment: ideal for Loewe sound bar and down-firing subwoofer

SCALA SC1652 sound element with SC1100 low board

## One SCALA. **Many sound systems.**

The SCALA SC1652 and SC1653 models come with an adjustable glass shelf to accommodate soundbars by a range of manufacturers. You also have space below the shelf for additional devices. Front-firing and down-firing subwoofers can be placed in the right-hand compartment.

SCALA SC1652 in snow glass with fabric-covered flap in silver  
docking station for iPhone and iPod, rotatable TV mount.

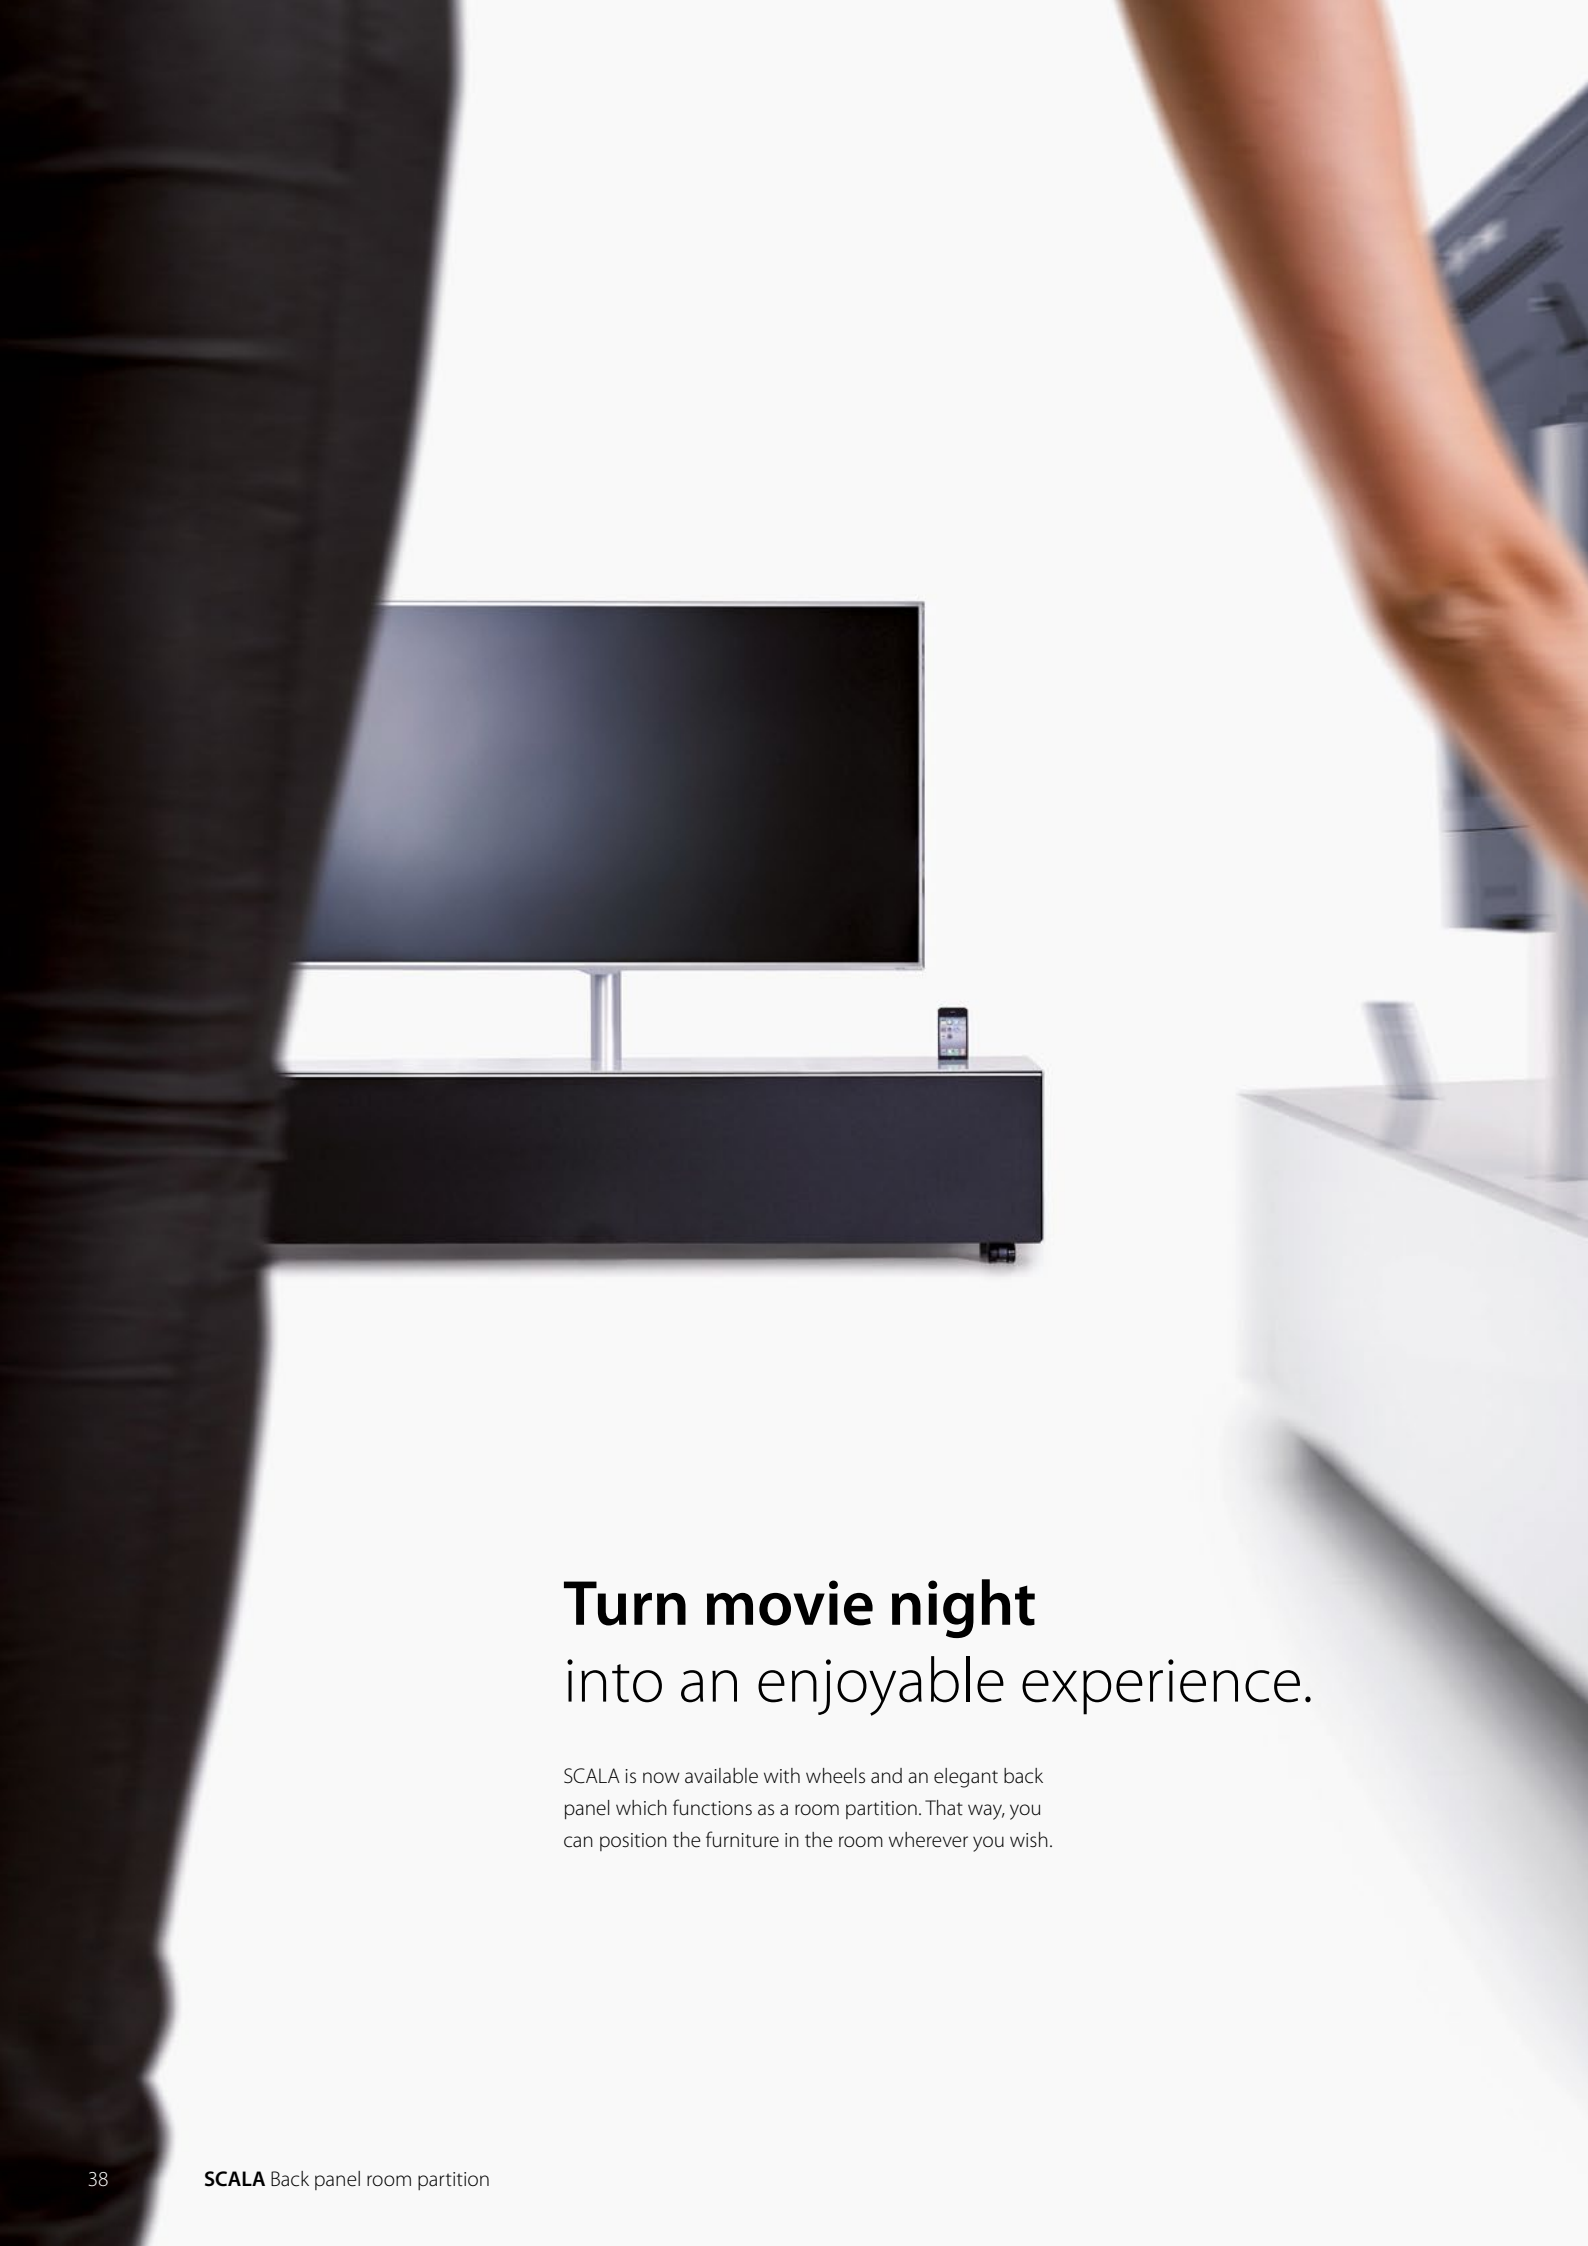

## Recommendation of the house.

Looking for a compact TV furniture unit which can also house your entire audio and video equipment? Then let us recommend SCALA, a particularly tasteful solution:

SCALA SC1651 with fabric flap, rotatable TV mount, docking station for iPhone and iPod and BRA1 sound system

## Turn movie night into an enjoyable experience.

SCALA is now available with wheels and an elegant back panel which functions as a room partition. That way, you can position the furniture in the room wherever you wish.

Sound prepared (SP): floor opening with fabric covering for integrating a subwoofer (down-firing), e.g. Loewe Individual Sound Subwoofer. Max. size of subwoofer: 400 mm x 1599 mm x 173 mm (D x W x H)

Drawer (SL) with premium soft closing mechanism

Scratch-resistant safety glass.  
Front with fabric flap, anodised aluminium handle

Open wall cabinet (SCH37/SCH48).

The cabinet comes with a matt coating in black (SW), white (WS) or carbon (CB). The interior back panel is made of glass and coated in the same colour as the cabinet. The glass panel is also available in choice of NCS colour. The glass panel is interchangeable and is an inexpensive option for changing colours to suit your needs

Fabric-covered flap in black, silver or carbon

## General information

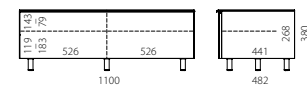

- Glass surfaces: black (BG), snow (SNG), silver (SV), choice of NCS colour (10% surcharge)
- Bottom panel for low boards: with cable opening as standard
- Glass top panel: coloured safety glass, 4 mm, glued
- Cabinet colour of interior low boards and closed wall cabinets: black
- Fronts: coloured glass as glass surfaces indicated above or with a fabric flap in black (BF), silver (SF) or carbon (CF) with aluminium handle
- Cabinet colour of wall cabinets: black (SW), white (WS) or carbon (CB)
- Glass back panel of open wall cabinets: black (BG), white (SNG) or carbon (CG) (the colour of the glass back panel is always the same as the cabinet colour, surcharge for different colour is 10%)
- Glass shelves: safety glass (clear), 6 mm, adjustable, spacing 32 mm
- Glass side panels: generally on exterior, position must be specified (L for left and R for right and LR for left and right), Exceptions: for SCH900 LR only possible and no glass side panels for open wall cabinets

### Adapter for streaming photos and audio wirelessly

**ZU 1756** Advance Acoustic Bluetooth Adapter for streaming music via Bluetooth wirelessly

**ZU1755** Apple TV for streaming music, photos and video via WLAN wirelessly

# Stay sophisticated.

Do you love classic furniture, and modern home cinema technology too?  
The puristic DISC by SPECTRAL harmonises classic and modern design in one piece of furniture:  
The levitating unit atop a robust glass base offers space for a variety of sound systems and  
additional devices. DISC is also available with a docking station for iPhone and iPod.

# Set yourself **free.**

No matter which sound system you envisage, DISC offers you a wide range of solutions. DISC DS02 is optimised for SPECTRAL sound systems BRA1 and SCA1. The DISC DS01 model offers space for a range of soundbar systems by various manufacturers.

DISC DS02 in snow glass with fabric flap in silver with SPECTRAL sound system BRA1, docking station for iPhone and iPod and rotatable TV mount

DISC DS01 is the universal solution for a wide range of soundbar systems with subwoofer. What's more, there is even enough space for 2 devices. The included universal adaptor fits soundbars that have a maximum size of (D x W x H): 80 mm x 1300 mm x 100 mm.

DISC DS01 in snow glass with fabric flap in silver docking station for iPhone and iPod, rotatable TV mount and Samsung HW-E450 sound system.

# Bose

## beats for better sound.

The DISC DS03 and DS04 models offer an excellent new home for the Bose Cinemate 1SR and Lifestyle 135 home cinema systems. A recess on the upper edge of the furniture offers space for the Bose Speaker Array. There's also additional space for the accompanying Acoustimass Module behind the fabric-covered flap of the DS04 giving you impressive deep bass and no intrusive subwoofer standing around.

DISC DS03 in snow glass with fabric flap in silver for Bose Speaker Array, docking station for iPhone and iPod, and rotatable TV mount

DISC DS04 in snow glass with fabric flap in silver for Bose Speaker Array and Acoustimass Module, docking station for iPhone and iPod, rotatable TV mount

# The best home cinema in town.

As proud as you are of your multimedia equipment, that doesn't mean you want to look at it all the time. Well, with COCOON, the multifunctional media furniture from Spectral, you don't have to. In addition to a dock for iPhone, iPod and iPad, COCOON offers plenty of space for integrating a wide range of sound systems. To connect all cables, simply remove the magnetically attached glass shelf.

COCOON Combination as room partition in snow glass with fabric flap in black, BRA1 sound system, rotatable TV mount, docking station for iPad, wall cabinet in snow glass and choice of NCS colour

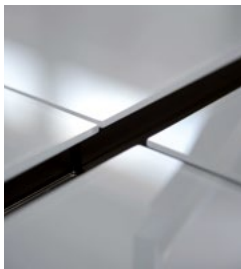

Adjustable feet made of polished stainless steel

Quick and easy cabling thanks to removable magnetically attached glass tops

Drawer element with mirrored front and CD/DVD storage insert

Flower. **Power.**

COCOON as room partition in snow glass  
with fabric flap in black, BRA1 sound system,  
rotatable TV mount, docking station for iPad

## Open to everything.

Sound systems can be completely unleashed behind the technical element's non-transparent, fabric-covered front. The interior can be divided up flexibly to store sound projectors, a subwoofer and centre speaker. Thanks to the opening in the base of the furniture, subwoofers with down-firing function can also be operated within the cabinet.

For **SPECTRAL** BRA1 or SCA1 sound systems

For **Samsung** sound systems

For **Bose** CineMate 1SR and Lifestyle 135 sound systems

COCOON furniture element CO2 in snow glass  
with docking station for iPhone and iPod

## Hello iPad.

COCOON comes not only equipped with docking station for iPhone and iPod, but also one for iPads. The original Apple Universal Dock and iPad dock including matching cables (both available as accessories) are located under the furniture's magnetically attached glass top. The Apple devices are simply placed in the dock and are immediately connected to the television and sound system.

COCOON furniture element CO3 in snow glass  
with docking station for iPhone and iPod

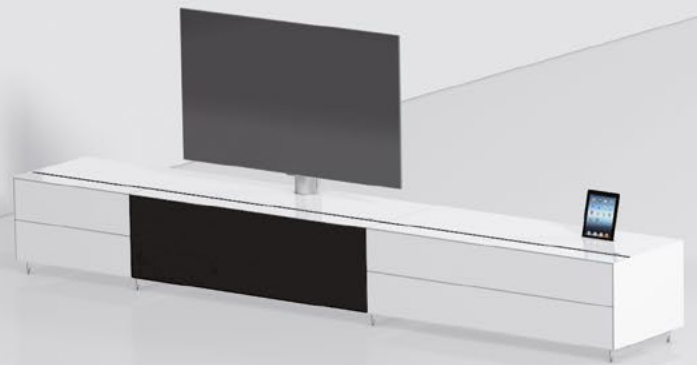

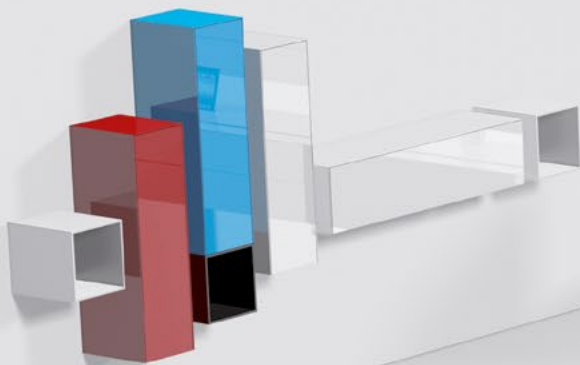

## The latest from our workshop.

COCOON is now available with acid etched glasses surfaces. The matt appearance of the glass forms an exciting contrast to the polished stainless steel feet.

## Two times four is infinity.

Thanks to its modular construction, COCOON can be expanded in a variety of ways.  
Just eight elements are all you need to arrange your furniture just the way you want it.

**Subwoofer opening (SP)** in bottom for CO2/CO3 with fabric covering

**Fabric-covered flap for CO2/CO3 (STS)** in black, silver or carbon

**Cable opening in bottom (KB)** for CO2-CO5

# Simplify your **living room.**

Tidy up your life with BRICK, the world's first TV furniture with sound system in the base. The virtual surround sound system is concealed in the unit and offers impressive sound with no intrusive speakers and visible cables in plain sight. Even audio and video equipment disappear in the generous space behind the brilliant and shiny glass front.

# What BRICK wears **underneath**.

Typical of BRICK is the recessed base which makes the furniture appear to levitate. In addition to a standard base in black, there is also an elegant mirrored base. A range of sound bases offer an extra acoustic highlight with fabric covering for storing sound systems.

# Sound, that will knock you off your pedestal.

The sound base from BRICK offers space for different sound systems. Thanks to the black fabric covering, speakers disappear entirely beneath the furniture.

Sound bases for SPECTRAL BRA1 sound system

Sound base BRS6/BRS7 for Bose CineMate 1SR, GS and Bose 3-2-1 GS, GSX and Lifestyle 135 speaker arrays

Sound base BRS4/BRS5 for Bose CineMate 1SR, GS and Bose 3-2-1 GS, GSX and Lifestyle 135 speaker arrays and Acoustimass Module

## Simply **plug and play.**

BRICK is also available with a docking station for iPhone and iPod. Simply place your device in the dock and you can stream movies and music directly to your TV and sound system. Your iPhone or iPod is also charged in the process.

# BRICK at a glance.

More than 2,000 colours, three different widths, five different heights, as well as a variety of combinations of drawers and flaps. BRICK has the right solution for whatever your needs may be, BRICK doesn't skimp on the extras: the rotatable TV mount and the drawer insert for CDs/DVDs are reliable and very popular.

# Dock the table.

COCKPIT is the elegant end table range with a docking station for iPhones and iPods. Now you can have the control centre for your photos, music and videos directly next to your sofa. The Apple Dock is concealed under the glass top, and the CP03 model even stores an entire subwoofer.

## There's no substitute for Storage Space.

The COCKPIT CP03 model is not just a control centre and Storage Space in your living room. It hides bulky front-firing and down-firing subwoofers inside the cabinet. The adjustable glass shelf offers enough space for your devices, magazines and odds and ends.

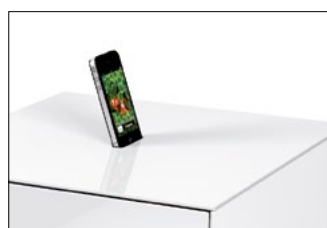

Fabric-covered doors in carbon

Fabric-covered doors in black

COCKPIT CP03 in snow glass  
with fabric-covered door in silver  
with docking station for iPhone and iPod  
and space for front-firing and down-firing subwoofer.  
max. size of subwoofer: 390 x 375 x 400 mm (D x W x H)

iPhone rotatable in all directions thanks to magnetically attached glass panels (CP02 and CP03)

COCKPIT CP02 in snow glass  
with drawer

COCKPIT CP01 in snow glass

## General information

- Glass surfaces: black (BG), snow (SNG), silver (SV), choice of NCS colour (10% surcharge)
- Cabinet interior: black
- Top panel: slot for iPhone dock as standard
- Glass side panels
- Fabric-covered hinged doors: black (BF), silver (SF), carbon (CF)
- Base: lacquered glass panel + aluminium tube (D = 30 mm)

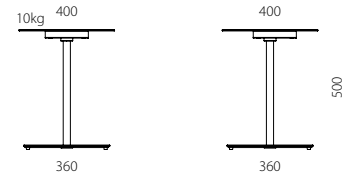

The infrared link system ZU1281 is required to control the iPhone/iPod docking station

## Models

### CP01

Glass top  
Hidden cable runs through the base  
Docking station for iPhone/iPod

**ZU 1755** Apple TV for streaming music, photos and videos via WLAN wirelessly

# Anything planned for today?

CATENA is the individually tailored home cinema and lounge furniture by Spectral. With cabinets in various widths, heights and depths. With flaps, doors or drawers. With high-quality sofa upholstery for lounge areas. With a variety of mounting solutions for flat-screen televisions. And with an integrated virtual surround sound system for impressive sound – without visible cables, intrusive speakers, subwoofer and receiver.

Wall panel with TV mount  
and integrated cable runs

Optional: panel/base  
with indirect LED illumination

Integrated virtual surround  
sound system CLA1

Wall cabinets with doors  
in various styles and  
high-quality flap mechanism

Base or wall mounting

Cabinets in a variety of widths and heights.  
High-quality flap mechanism ensures soft  
opening and closing. Variation: drawer with  
high-quality soft closing mechanism

# From svelte **to shelf.**

CATENA is a lot more than just smart television furniture. Its wide selection of cabinets enables you to create entire living and office spaces. Whether bench, room partition or as seen here, a wall unit. with CATENA your possibilities are virtually limitless.

Rotatable  
TV mount

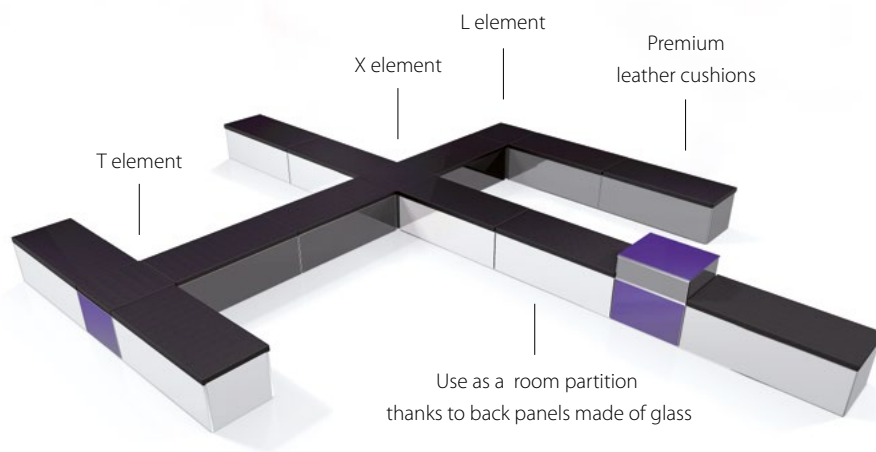

Integrated virtual surround  
sound system CLA2

# Think **outside the box.**

CATENA is the perfectly conceived individually tailored furniture that offers endless design possibilities.

With the help of the L, T and X elements, the furniture can be expanded every which way and can be positioned in the centre of the room thanks to back panels made of glass. Premium leather covers make them perfect for sitting on.

Cushions made of  
premium leather

Integrated virtual surround  
sound system CLA2

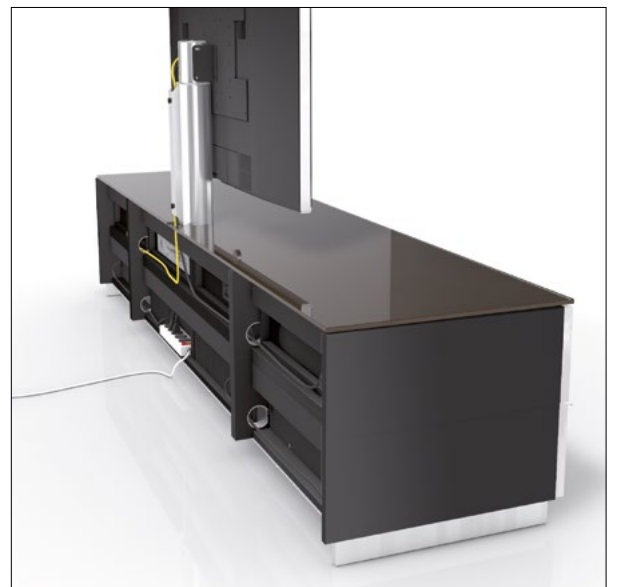

# The inner beauty of CATENA.

The most beautiful aspect of CATENA is everything that you do not see. The fabric-covered fronts conceal a virtual surround system for impressive home cinema sound. Even the cables disappear in the furniture. Horizontal cable holes between the cabinet units allow technical equipment to be neatly cabled together. There is even room for power strips behind the furniture. Curtains serve as a screen (from the front) and dust protection (from the back). Compartments without technical equipment have covers to prevent a view of the inside.

You have a choice of a one-piece (CTA1) or a four-piece system (CTA2) with a proportionately bigger soundstage.

Rotatable TV mount with integrated cable runs, space for power sockets and horizontal cable holes for easy cabling between technical equipment

Curtain to conceal the unsightly cable chaos behind devices

Thanks to the fabric-covered flaps, front speakers and subwoofers can be concealed in the furniture and operated from there. Another benefit of the fabric-covered flaps: All technical devices with increased heat generation such as media servers or game consoles or Blu-ray players won't overheat.

# First a **great sitting experience.**

In addition to the standard glass tops, premium leather seat cushions made of soft, robust genuine leather, are available for CATENA. Transforming the furniture into an elegant, comfortable bench for your living room, office or lounge areas.

High-quality leather seat cover

# Followed by a **great cinema experience.**

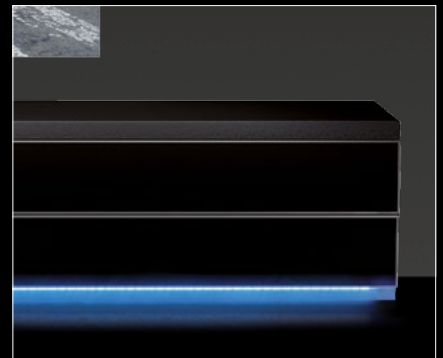

Lights out, drawer open, projector on, let the movie start rolling – that's all it takes to transform CATENA into a captivating home cinema experience. The multi-coloured LED illumination creates a special ambiance, with the infrared remote control included, you can choose a colour to suit your mood or set a fascinating programme of colour changes. Along with the colours you can also bring up a pleasant white light. The brightness is adjustable.

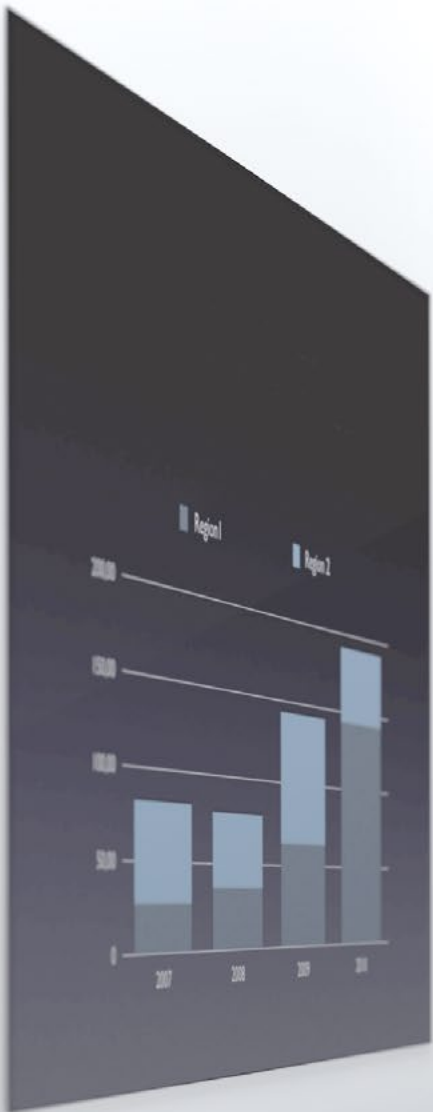

**Integrated virtual surround sound system CTA2**  
for impressive sound without intrusive speakers and visible cables.

**Projector drawer**  
for the Hitachi® CP-AW250NM, CP-A221NM, CP-AW251NM and CP-A301NM ultra wide angle projectors. For a home cinema experience without the hassle of installing a projector and laying metres of expensive cables.

**Indirect illumination**  
with remote-controlled multi-coloured LED strips

# Top drawer presentations.

Impress your business partners and friends – with the integrated CATENA projector drawer.

Stowed out of sight and in the furniture, the projector is ready for use in a few seconds just by pulling out the drawer. Combined with an integrated sound system, CATENA is transformed into an elegant complete solution for training rooms, conference rooms and offices with no complex installation of speakers or projectors needed.

Mobile projector trolley with active sound system  
for use in different rooms

# Everything **in order?**

There are a host of practical elements for hanging files, CDs, DVDs, keys, pens, mobile telephones, coffee capsules and bottles available for CATENA to bring order to your home or office.

# **SPECTRAL** CATENA PLANUNG

© 2008 Ferrari - Museo Nazionale Ferrari

Museo Nazionale Ferrari  
Ferrari Museum

# So that you can plan better.

With our "CATENA Planning" brochure, you can design your own CATENA system step by step. The brochure is available as a PDF from [www.spectral.eu](http://www.spectral.eu) or from your nearest authorised CATENA partner. They can even help you configure your furniture on a computer, using the CATENA 3D planning software.

**Planning made simple thanks to  
the CATENA planning software  
at your local retailer.**

# Quality you can touch.

## **Made in Germany**

While more and more furniture manufacturers are moving production to the Far East, at SPECTRAL we're remaining faithful to our roots. By having our works in Pleidelsheim near Stuttgart, we have made a clear commitment to a production site in Germany. A decision from which not just our staff benefit, but also you as valued customer as well. Only in doing so can we uphold our high quality standards and turn your wishes into reality today and in the future.

## **Premium quality and sturdy materials**

We use only the best materials, fittings and dampers. All connecting elements are made from solid aluminium. The stainless steel used receives a high gloss polish, aluminium is polished and sealed.

## **Scratch-resistant and long-lasting**

The coloured glass surfaces by SPECTRAL are considerably brighter, more scratch-resistant and much easier to look after in contrast to the lacquered surfaces of other furniture manufacturers.

### **The SPECTRAL showrooms**

Visit our showrooms in Germany and the Netherlands and experience the perfect harmonisation of elegant interior design and breath-taking home cinema. Current visiting hours can be found at [www.spectral.eu](http://www.spectral.eu)

# Colour your World.

## **Glass surfaces in over 2,000 colours**

The coloured glass surfaces by SPECTRAL are considerably brighter, more scratch-resistant and much easier to look after in contrast to the lacquered surfaces of other furniture manufacturers. COCOON is also available with acid etched glass. You can choose from three standard colours and over 2,000 NCS colours with the help of a colour fan. You can order a glass colour sample from an authorised dealer for a small fee. This cost for one sample can then be credited towards your furniture purchase.

## **Natural variations**

Glass is a product made from natural resources and is subject to variations in the production process. Colour hues may vary due to the glasses individual colour, the thickness of the glass and the lighting conditions. As a result of the production process, the colour delivered may slightly differ from the sample. Colours may differ for subsequent deliveries of glass surfaces depending on the batch.

## **Standard colours for glass**

The standard colours of SPECTRAL furniture are silver (SV), snow (SNG) and black (BG). Choice of NCS colour and acid etched glass for COCOON furniture available at an additional charge.

## **Colours for fabric fronts**

The covers for fabric flaps and sound covers are available in three colours: black (BF), silver (SF) and carbon (CF). The covers for fabric flaps and sound covers for BRICK and CATENA are only available in black (BF).

### **Special thanks to**

Angela and Carsten Gieck for the fantastic location
