LANDSCAPE SERIES

Alfresco entertaining has become a way of life. There is nothing quite like the experience of an architecturally designed patio featuring a highly appointed outdoor kitchen, wrapped in beautifully landscaped gardens and bordered by a sparkling swimming pool. This is luxury living at its very best.

It's all about creating the perfect ambience; a place where your senses are tantalized by smells, tastes, sights and sounds.

While Mother Nature provides the perfect backdrop, it is music that delivers the finishing touch. The challenge is however, getting the volume comfortable for everyone, everywhere. People sprawl out into different spaces, some engrossed in conversation, others engaged in backyard football or splashing in the pool, while there are those who just want to lay back and relax. How can everyone enjoy the perfect listening level when they are all in various areas doing different things? In other words, how can it be loud enough for everyone to hear, without drowning out conversations, or disturbing the neighbors?

The answer is SONANCE Landscape Series.

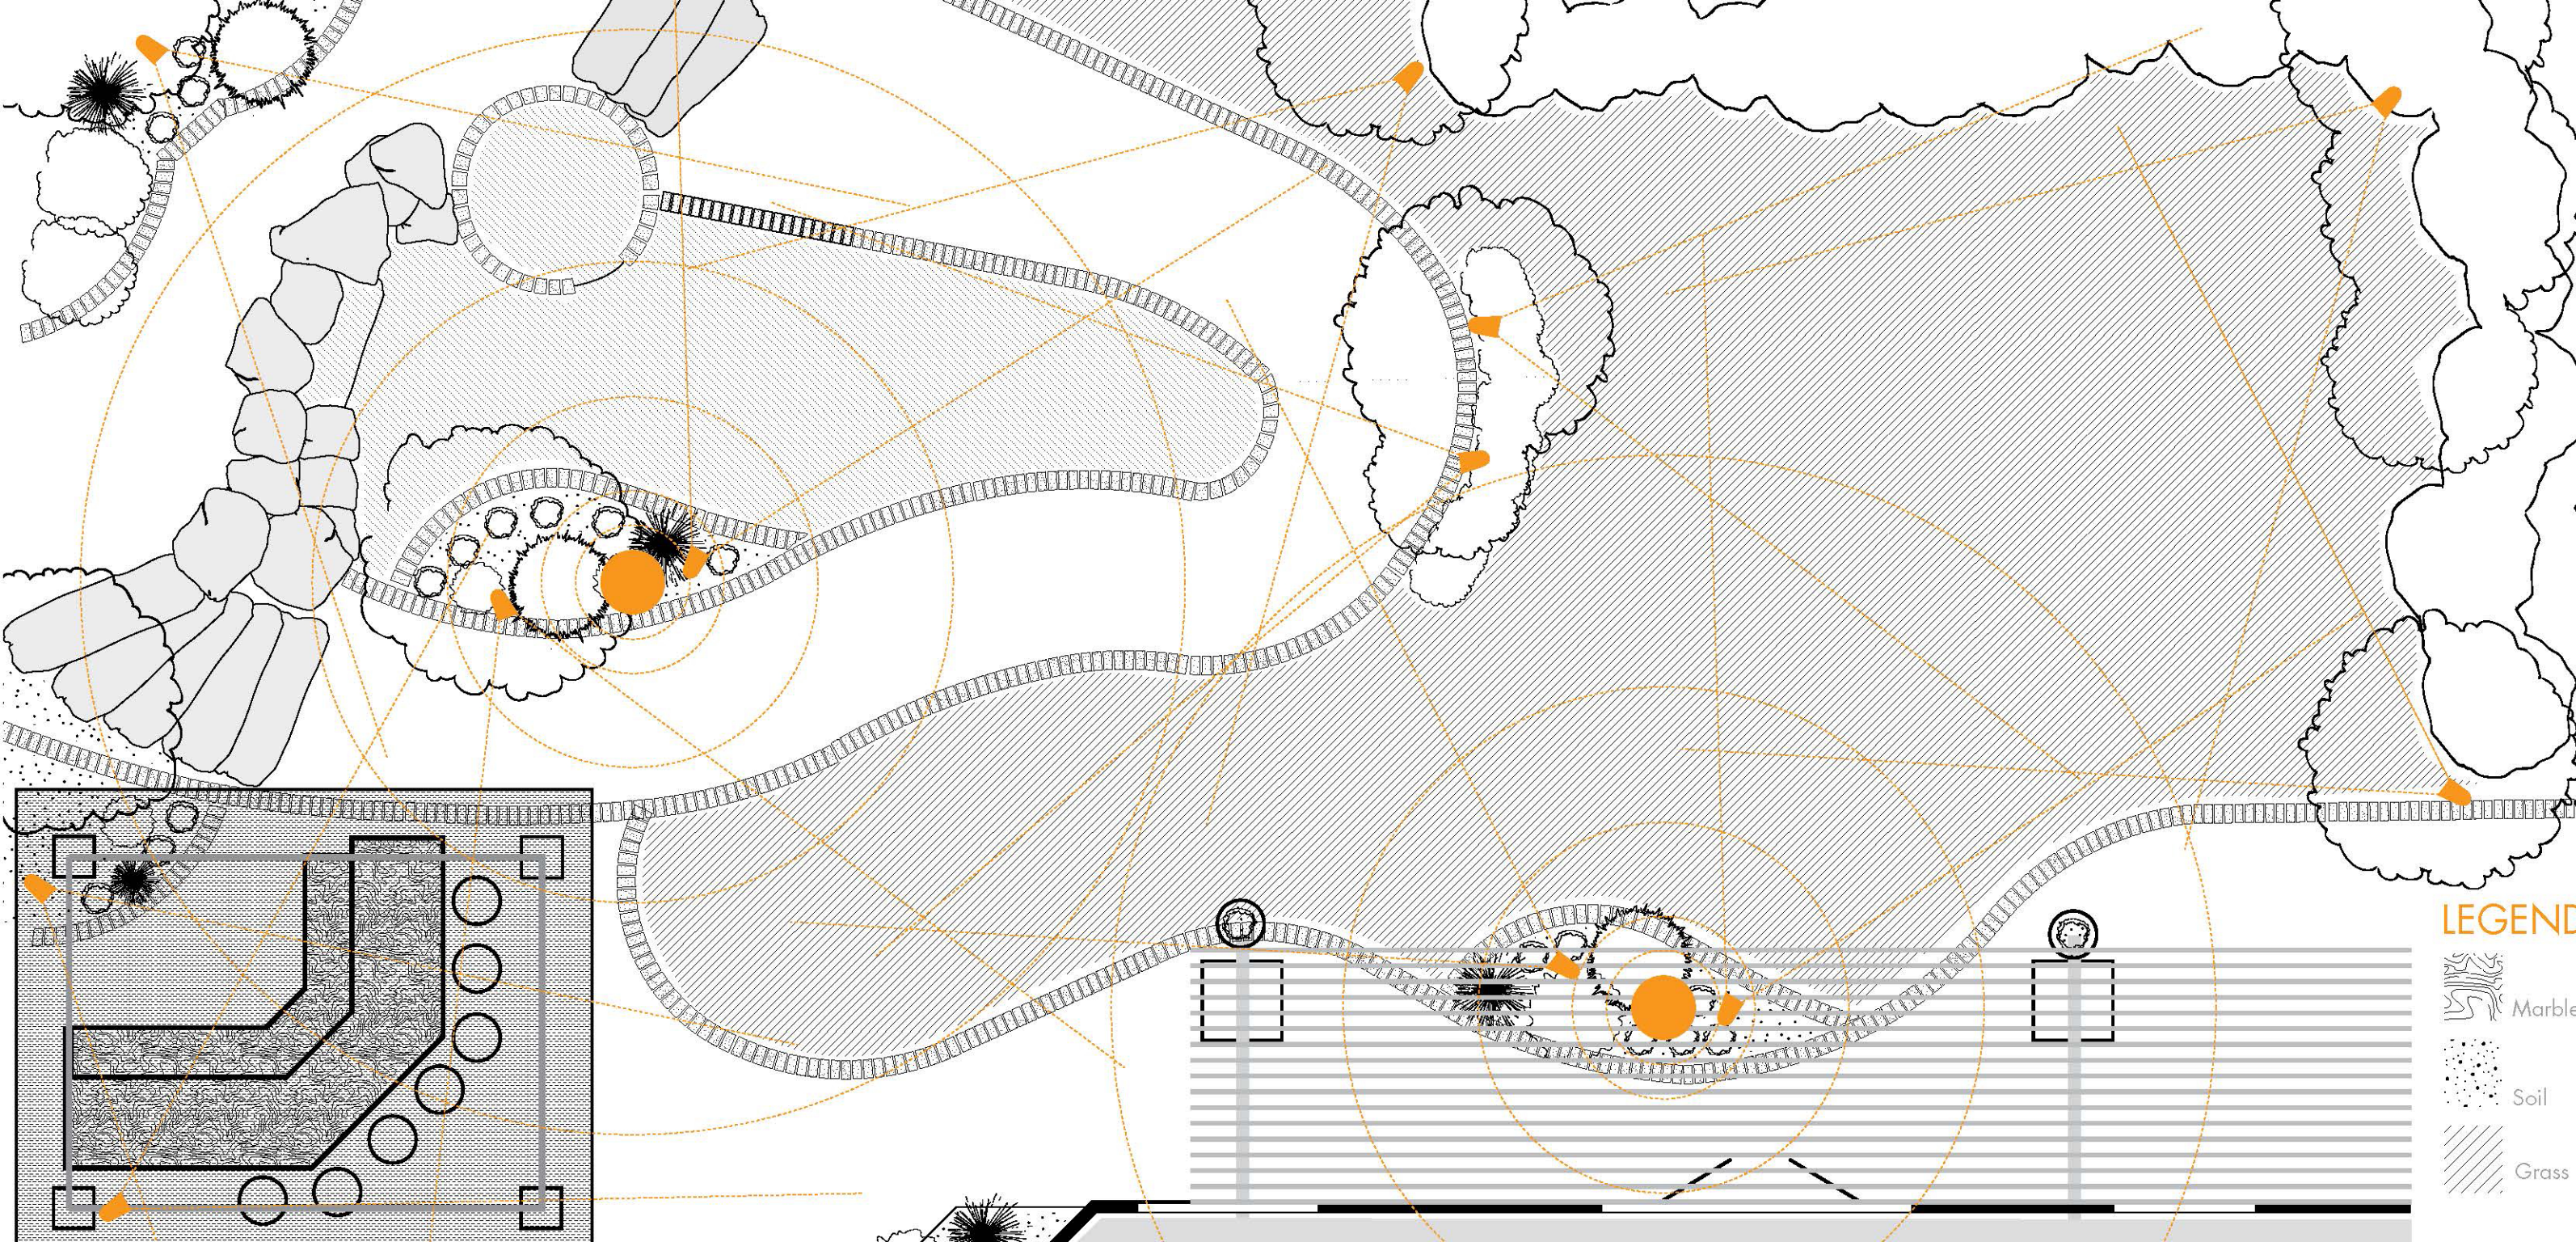

Sonance Landscape Series uses strategically placed "satellite" speakers that are hidden within garden beds or in amongst the foliage of trees. A subwoofer enclosure is then buried under ground or within shrubs, with just an earth-colored hood dispersing sound perfectly. It's all about blending discreetly into the surroundings.

The result is a garden that immerses its guests in the highest quality sound, always at the perfect volume, no matter where they are, or what they are doing. And because the system is camouflaged, the music simply comes from nowhere.

SONANCE Landscape Series

“The perfect sound, everywhere.”

BENEFITS

HIGH FIDELITY SOUND OUTDOORS
Finally, an outdoor audio system that provides true high fidelity sound. Separate speakers for different frequencies, the cornerstone of high-end audio, is achieved with the LS47SAT, LS67SAT satellite speakers and LS10SUB subwoofer.

THE 70 VOLT ADVANTAGE
Landscape Series operates on a 70 Volt system that provides the flexibility to customize the design for any size installation. From small courtyards with just a few speakers, to an entire resort garden with hundreds, SONANCE Landscape Series provides the ultimate outdoor sound combined with the reliability and cost saving of a simple "daisy-chain" configuration.

MULTIPLE ZONE CAPABLE
Just as you would have different "zones" for different rooms of your house, so too can your SONANCE Landscape Series have different volumes and even sources, in different areas of your outdoor space.

EXPERT DESIGN, SUPERIOR RESULTS
No two gardens are alike, so an authorized SONANCE Landscape Series Dealer will provide professional design services to ensure the absolute best result is achieved.

LEGEND

	Marble		Brick		Rock
	Soil		Overhang		Satellite Speaker
	Grass		Water		Subwoofer

From the company who pioneered the world's first in-wall and in-ceiling speakers comes an outdoor system that delivers the same uncompromising performance combined with minimal visual impact. Whether hidden amongst plants and shrubs, placed within foliage in trees, or mounted to outdoor structures, SONANCE Landscape Series is designed to hide.

With the ability to combine mounting locations at any height, SONANCE Landscape Series blends sound seamlessly in the air, creating the ideal ambience and musical presence and delivering the perfect volume, everywhere, every time.

The right material for a speaker is as important as the design itself. The SONANCE Landscape Series satellites are constructed of a high quality PVC composite molded with UV-stable color for durability, and a powder coated steel mesh to protect vital speaker parts. The LS10SUB features a textured coating around the subwoofer enclosure and a "Hammerstone" powder coated finish on the canopy for strength and camouflage.

SONANCE Landscape Series was designed to operate under the most extreme weather conditions: from -20° to 190° Fahrenheit (-29° to 88° Celsius). Durable and lightweight materials, triple sealed enclosures and waterproof connectors, combined with marine grade components allow SONANCE Landscape Series speakers to stand up to the harshest surf, sun, sand, snow and salt. It is this durability that will lead to years of worry-free outdoor entertainment.

LS47SAT

Woofer Diameter: 3.5" (88.9mm)
 Tweeter diameter: .75" (19.0mm)
 Frequency response: 80Hz-20kHz±3db
 Listening Area: 60°, 10'-50' distance
 Speaker input: 70.7volt / 25 watts
 Weight: 2.5 lbs. (1.2Kg)

LS67SAT

Woofer Diameter: 6" (152.4mm)
 Tweeter diameter: .75" (19.0mm)
 Frequency response: 60Hz-20kHz±3db
 Listening Area: 60°, 10'-50' distance
 Speaker input: 70.7volt / 25 watts
 Weight: 6 lbs. (2.7Kg)

LS10SUB

Woofer Diameter: 10" (254.0mm)
 Frequency response: 35Hz-100Hz±3db
 Listening Area: 2000 sq.ft.
 Speaker input: 70.7volt / 100 watts
 Weight: 54 lbs. (24.5Kg)

LS12SUB

Woofer Diameter: 12" (305mm)
 Frequency response: 25Hz-80Hz±3db
 Listening Area: 2000 sq.ft.
 Speaker input: 70.7volt / 200 watts
 Weight: 70 lbs. (31.7Kg)

ACCESSORIES

- 19" (482mm) Ground Stake
- 9" (228mm) Ground Stake
- Tree Mount
- Surface Mount
