

S-1500

**MULTI-CHANNEL
POWER AMPLIFIER**

KRELL
THE LEADER IN AUDIO ENGINEERING

**Legendary Krell amplifier
performance in a multi-channel,
upgradeable, new design.**

The S-1500 Multi-channel Power Amplifier
is available in silver or black.

S-1500

MULTI-CHANNEL
POWER AMPLIFIER

DESIGN

Based on a rock solid, linear power supply design, the S-1500 is virtually impervious to speaker demand or AC line fluctuations. A 1,500 VA toroidal transformer and robust, 80,000-microfarad array of quick-charging filter capacitors offer enormous energy storage, available in an instant. This supply is designed for massive current delivery while maintaining an ultra-low noise profile. Surface mount technology is utilized in the amplifier channels to achieve the high circuit density required for wide bandwidth performance. Eight high-speed power devices per channel deliver 150 W into 8 Ohms and 300 W into 4 Ohms. The amplifier is stable at any load impedance. Krell Current Mode™, fully bal-

anced topologies, are utilized for all amplifier channels for the lowest noise and greatest detail retrieval. Class A circuitry is utilized in the input, pre-driver, and driver stages to provide the most accurate signal path. All channels support balanced and single-ended inputs. High quality, 5-way binding posts allow speaker connections via bare wires, spade lugs, or banana plugs.

A modular platform provides an upgrade path for the S-1500/3, S-1500/5 and S-1500/6 amplifiers, enabling additional channels to be installed at any time. The base platform includes input and speaker connections for 7 channels, making upgrades a simple matter when desired.

FEATURES

- 3/5/6/7 Channel Modular Power Amplifier
 - 150 W, 300W (8, 4 Ohms) - S-1500/5-7
 - 175 W, 350W (8, 4 Ohms) - S-1500/3
 - Krell Current Mode™
 - 1.5 kW Toroidal Transformer
 - 80,000 Microfarads of Filter Capacitance
 - 12 VDC Triggers
 - 17.3 W, 5.7 H, 19.8 D, in.
43.9 W, 14.5 H, 50.3 D, cm
